Efficiency, accountability, and visibility in the palm of your hand

We make it easier to run great restaurants. One of the tools we use to accomplish this is our QSRSoft Forms solution. QSRSoft Forms turns all your time-consuming, headache-inducing manual processes into a digitized dream. Streamline your operations while enjoying better data visibility and employee accountability in the process. Here's how it's done:

Here's how QSRSoft Forms works for you:

Save time and boost efficiency by digitizing manual processes

Stay on top of operations compliance with real-time mobile alerts

Maintain compliance and brand standards, including food safety

Automatically create, assign, and track tasks based on results

Make powerful, informed decisions with accurate, up-to-date data

Here's how QSRSoft Forms works for you:

Save time and boost efficiency by digitizing manual processes

Performing audits, tracking employee tasks, practicing for visits and more by hand eats up a ton of time. Performing processes by hand cost restaurants thousands of dollars every month. And the mistakes made by these manual processes could cause even more damage to your bottom line. Our QSRSoft Forms solution lets you easily digitize any manual process, transforming once-tedious tasks into effortless processes, incorporating real-time alerts to let you and your staff know when a task needs to be done. Save hundreds of labor hours each year and get the data transparency you need to help you grow and scale.

Stay on top of operations compliance with real-time mobile alerts

Even the most seasoned restaurateur can miss a new restaurant regulation. That's because state and city regulations vary, often changing and adding new regulations. Noncompliance can lead to costly fines or worse: you could get shut down. QSRSoft QSRSoft Forms helps you avoid this by sending you real-time mobile alerts if a process isn't followed. It also outlines the tasks and forms needed to maintain compliance, measures your progress, and shows you how close to completion you are. Managing compliance has never been easier!

Maintain compliance and brand standards, including food safety

Aside from city and state regulations, food safety and brand standards are just as important for the success of your QSR. QSRSoft Forms breaks down all the tasks you need to stay on top of both. Create digital food safety-related QSRSoft Forms, creating tasks for you and your staff that you can access, and check off once complete, on any device. While integrating to a variety of thermometers, QSRSoft Forms also sends real-time notifications to your devices, so you can keep track of these standards no matter where you are. Keep you and your managers and franchisees on the same page when it comes to maintaining brand standards across each of your locations.

Automatically create, assign, and track tasks based on results

Simplify your workflows by creating digital tasks in QSRSoft Forms. QSRSoft Forms lets you assign tasks to your employees, track the progress and completion of those tasks, and informs you when they've been completed. Digitizing tasks, even creating custom ones for your business, helps you create accountability and better communication with staff, who will have clear direction on what needs to be done and when. QSRSoft Forms helps you manage these tasks across locations, and from any device.

Make powerful, informed decisions with accurate, up-to-date data

Data is your superpower as a restaurant owner or franchisee. It gives you a peek into what's working and what's not, and helps you forecast for the future. QSRSoft Forms puts all your most important business process metrics at your fingertips. From managing your workflows to controlling your budget to ensuring compliance, the real-time data that QSRSoft Forms creates gives you the data transparency and accountability you need to succeed.
