Protect your business all of the time, in real time

Protecting your business from theft and fraud is a full-time job in itself. Research shows that restaurants lose up to 5% of their revenue each year from related crimes. What if you don't have the time or the tools to stay vigilant? Introducing QSRSoft Security—a fully integrated system that uses smart technology and real-time alerts to guard your data and your business. Here's how it works:

Here's how QSRSoft Security works for you:

» **Flag potential fraud using technology and real-time alerts**

» **Investigate suspicious activity with seamlessly integrated video surveillance**

» **Identify high locations and employees with targeted transaction dashboards**

» **Quickly search and find transactions for quick customer recovery**

» **Keep employees honest by tracking high frequency app usage**

Here's how QSRSoft Security works for you:

Flag potential fraud using technology and real-time alerts

The QSRSoft Security system is equipped with advanced video technology that constantly monitors and analyzes your data, looking for suspicious and fraudulent activity. When a potential problem is detected, you'll get a real-time mobile alert so you can act immediately. What could be a costly security breach, theft, or fraud can then be handled quickly and efficiently before it becomes a bigger problem.

Investigate suspicious activity with seamlessly integrated video surveillance

Our QSRSoft Security system seamlessly integrates with your video surveillance and point-of-sale (POS) systems. Video coupled with smart technology and analytics tools makes this a comprehensive security system that works tirelessly to protect your business, 24/7. Now you have POS data coupled with visual footage to adequately address any safety or security issue before it becomes a liability.

Identify high locations and employees with targeted transaction dashboards

While this powerful analytics technology tracks and scans transactions for potential problems, it also looks for potential opportunities. Targeted transaction dashboards let you track and measure important metrics like employee performance and sales across your locations. As a result, you can take identify ways to boost revenue and recognize hard-working employees, improving employee engagement and retention.

Quickly search and find transactions for quick customer recovery

Handle customer issues and complaints quickly and effectively, ensuring a positive customer experience and reducing brand-damaging negative reviews. The QSRSoft Security system lets you find a transaction immediately, and identify and correct the issue before you lose a customer. And integrated video footage gives you the visual evidence you need to address concerns without dispute.

Keep employees honest by tracking high frequency app usage

Every transaction in every location is tracked, providing a check-and-balance system that lets you nip employee theft issues in the bud while praising honest employees for their hard work. Our QSRSoft Security solution even lets you customize mobile alerts based on the metrics important to you, sending you immediate notifications for the stuff you want to track. And any suspicious activity is flagged instantly, allowing you to address it in the moment.

Use smart technology to fight theft and fraud with QSRSoft Security.
